Office Action Summary	Application No. 10/623,701	Applicant(s) BURMEISTER ET AL.	
	Examiner Peter R. Brown	Art Unit 3636	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 July 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Applicant's election of figures 1-4 in the reply filed on July 26, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 16-34 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on July 26, 2005.

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 8, there is no recited connection between the backrest and the seat, which is required to provide a clear and definite claim.

Also in both claims, the "recliner mechanism back" has been recited twice, once in line 2 and once in line 3. Moreover, it is not clear as to what defines the front and back of the recliner mechanism. Is it the front and back of the slot, or the front and back of a mounting bracket? The same applies to the "recliner mechanism top", in relation to the slot, bracket, or connection between the seat and the backrest. Clarification is required.

Note that the phrase "recliner mechanism side arcuate slot curve center" should be changed to "center of curvature" or the like, for clarity.

Throughout the claims, the term "H-point" has been used but has not been defined. Note that such a point must be defined in structural terms and positioned relative to the claimed structural elements in order to clearly and positively set forth the invention.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, so far as definite, are rejected under 35 U.S.C. 102(b) as being anticipated by Rudolph.

Rudolph (figs. 2-5) shows structure as claimed, including an arcuate slot for a reclining backrest, wherein the center of curvature is located above and between the front and back of the recliner mechanism. As the "H-point" has not been sufficiently defined in the claim, little patentable weight is given to the position thereof relative to the center of curvature of the slot.

Claims 1-4 and 8-15, so far as definite, are rejected under 35 U.S.C. 102(b) as being anticipated by Boisset.

Figures 1-5 shows structure as claimed, including an arcuate "slot" for slidably engaging a reclining backrest. As the "H-point" has not been sufficiently defined in the claim, little patentable weight is given to the position thereof relative to the center of curvature of the slot.

Claims 5-7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Case, Hiramatsu, Hotta, Johnson, Golynsky, and Kusiak et al show various features of the invention.
